

MEMORANDUM FOR: Deputy Director for Security (PSI)
Deputy Director for Security (PTOS)

SUBJECT : MBO Objective OS-D 01-76

1. Attached is a copy of the action plan for DCI level objective OS-D 01-76. The Policy and Plans Group will serve as the action office for this objective, but it will require extensive participation by all Office of Security components. Accordingly, each division level component will be expected to identify at least 10% of their records for reduction. It should be noted that the original proposal of the DD/A called for a 25% reduction. In addition to this objective, the office is required to participate in a similar Agency wide DCI level objective which calls for the reduction by 1 July 1976 of 10% of records storage equipment.

2. The purpose of OS-D 01-76 objective is two-fold. The first is the ever present necessity of reducing record holdings to increase efficiency and reduce costs. The second purpose relates to the current investigations of Agency activities. We can assume that when these investigations are concluded we will be required to purge our records of certain categories of files, perhaps with very short deadlines. Also recent experience has shown that we have many types of records which we may not be specifically directed to destroy but which are of questionable propriety or necessity.

3. In June 1975 the Annual Records Volume Inventory was compiled by the various components. Copies of Form 3581 reflecting the inventory for each of your components are attached. It is now necessary to identify by type and volume the records which made up the June 1975 inventory. In accordance with milestone one of the action plan this is to be done and submitted to the Policy and Plans Group by 30 September 1975. An infinite breakdown of record types is not necessary but significant types must be identified and measured, e.g., policy files - one cubic foot;

domestic security surveys - two cubic feet; security violation index cards - four cubic feet, etc. Less significant types may be labeled miscellaneous. The summation of the breakdown should represent the total amount of records shown in the inventory.

4. Milestone two requires that each type of record be categorized as (a) must be kept by law, directive or regulation; (b) must be destroyed; (c) should be kept; and (d) should be destroyed. Some types of records will be placed entirely in one category while others may be divided into two or more categories. For example, clear polygraph charts might be categorized as "should be destroyed" and noteworthy charts might be categorized as "should be kept." Also, certain types of records might be divided into different categories depending on age. You are to do this by 31 October 1975. You should be able to categorize many types of records on your own authority. Others may require higher level policy decisions. Some examples of records which today might be considered undesirable or unnecessary are:

- a. Certain polygraph charts and reports.
- b. Investigative reports of other agencies after they have served their initial purpose.
- c. Security survey reports of closed stations and bases.
- d. Personnel security files, including polygraph files, on indigenous employees no longer of interest.
- e. Selected inactive crank files.
- f. Terminated covert site files.
- g.
- h. Routine security violation reports.

5. Please refer any questions concerning this matter to Policy and Plans Group, ext

Deputy Director of Security (P&M)

Remarks:

The attached satisfies Milestone 1 of Objective OS-D 01-76 to identify the type and volume of records held by Office of Security components. The total volume of records reflected in this summation is in harmony with figures obtained in June in connection with our Annual Records Volume Inventory. Also, attached for your information is a copy of the Objective Action Plan and a memorandum sent to division level components advising of related reporting requirements.
